REGULATORY DECISION NOTE

Situation

FDA Q9(R1) final guidance, May 2023, replaces the June 2022 draft. Independent portfolio exercise; no commercial assessment.

Evidence Checked

FDA official listing; draft PDF page 1 (159218); final PDF page 6 / printed page 1 (167721). Scope: draft-to-final status.

Finding

Final source status is established in the official listing. Product/process applicability is not established.

What Remains Unknown

Actual product, site, process, SOP version, dossier context, responsible reviewer and organization requirements.

Risk of Deciding Too Early

Unsupported applicability can produce incorrect impact statements and premature changes.

Recommendation

Keep company impact UNKNOWN / HOLD. Qualified RA/QA review is required before deciding applicability or assigning changes.

Next Action

Retain originals and exact evidence; obtain organization context; assign a named reviewer; record the exact-revision decision. Open related BEACON case.
